

Mission Statement

After...

...five seasons and ninety-eight unforgettable episodes...

...a series finale that left the iconic hero cruelly stranded in time...

...numerous syndication runs that continue to attract new generations of fans...

...seventeen years of limbo, during which fans never gave up hope of Sam leaping again...

We, the fans of Quantum Leap, are thrilled to hear that this beloved and classic show may soon become a motion picture. HOWEVER, we, the very people who kept the show alive during its TV run, want God, Time, Fate or Whomever to know that OUR Dr. Sam Beckett (Scott Bakula) and OUR Admiral Al Calavicci (Dean Stockwell) need to play a prominent role in this venture. Scott and Dean must be allowed to reprise their roles and must not be relegated to minor status in any Quantum Leap movie.

Please join other QL advocates in making our preferences known to Don Bellisario, the writer [and producer] of this proposed film.
